

New Airwhite Products

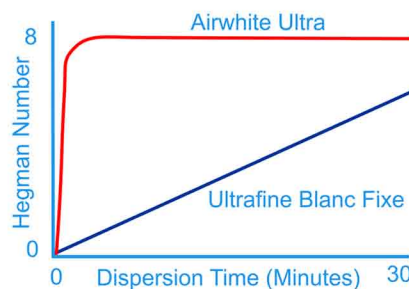

TECHNOLOGY TRANSFER - From Our Products To Your Coatings

Introducing two new products from Viaton processed from high purity natural white Barium Sulphate. Developed for lower formulation cost and **Enhanced Coating Performance**.

Airwhite Ultra

Ultra offers a direct replacement for synthetically produced Barium Sulphate.

Ultra, with a mean particle size of 1.3 microns is designed for high gloss formulations. Unique particle coating technology provides technical benefits and reduces process cost.

Key Benefits :-

- Ultra** low dispersion time
- Ultra** high gloss finish
- Ultra** high consistent quality
- Ultra** coating performance

Graph - Airwhite Ultra Low Dispersion time

Airwhite UltiMatt

UltiMatt is a close cut, fines reduced powder, optimised for gloss reduction in surface coatings. Multi stage processing technology ensures a precise top size omitting and optimising fine particle size content.

Key Benefits :-

- UltiMatt** wax reduction
- UltiMatt** incompatible resin reduction
- UltiMatt** durability
- UltiMatt** Quality
